### EXAMINER'S AMENDMENT

1. This action is responsive to communications: The Amendment filed 06/03/09.
2. The rejection of claims 61-64 and 66-70 under 35 U.S.C. 103(a) as being unpatentable over Baisley (US 6502112, filed Aug 27, 1999), in view of Aoyama et al (US 6098071, filed Jun 7, 1999), and further in view of Ball et al. (US 6,366,933, filed Oct. 27, 1995) have been withdrawn as necessitated by Amendment (06/03/09) as well as the Examiner's Amendment.
3. Independent claim 1 has been amended by the Examiner, which is discussed below in the Examiner's Amendment section.
4. Claims 61-70 are allowed as necessitated by the Amendment (06/03/09) as well as the Examiner's Amendment.

### *Election/Restrictions*

5. Claim 65 is allowable. Claim 65, previously withdrawn from consideration as a result of a restriction requirement, requires all the limitations of an allowable claim. Pursuant to the procedures set forth in MPEP § 821.04(a), **the restriction requirement between species I and species II, as set forth in the Office action mailed on 10/16/2007, is hereby withdrawn** and claim 65 is hereby rejoined and fully examined for patentability under 37 CFR 1.104. In view of the withdrawal of the restriction requirement, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are

no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

### ***Drawings***

6. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because: 1) The hand written drawings of Figures 1-3 are difficult to read; 2) Figures 6 and 7, illustrating HTML files, are illegible. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

### **EXAMINER'S AMENDMENT**

7. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

8. Preliminary authorization for this examiner's amendment was given in a telephone interview with William Galliani on 09/11/09. During the interview the newly added limitations (shown below) further defining Applicant's invention were discussed. It was agreed that said limitations in view of the Amendment filed 06/03/09 and in further view of the additional

features/limitations of independent claim 61 would overcome the applied prior art as well as place the Application in condition for allowance.

**Please Amended the Application as follows:**

Claim 61 (Currently Amended) A computer readable storage medium comprising executable instructions to:

- receive a first document and a second document coded in a markup language;
- parse the first and second documents to identify block elements in each document;
- apply a rules-based, multi-scan markup code reduction normalizer to the first and the second documents to create a normalized first document and a normalized second document maintaining the visual formatting of the first and second documents and having separate lines corresponding to the block elements in each document, the normalized first and second documents coded in the markup language;

- wherein the markup code reduction normalizer scans for and removes any markup code head element, reference to scripts, intradocument link, and relative URL, and then performs character-by-character processing except for identified pre-formatted text;

- perform a line-by-line comparison between the normalized first and second documents to find differences; and

- generate a comparison document coded in the markup language and preserving the visual formatting of one of the first and second documents to record the differences.

Claim 69 (Currently Amended) The computer readable storage medium of claim 61, wherein the executable instructions to perform a line comparison comprise executable instructions to apply a ~~typical~~ line-by-line comparison to the normalized first and second documents.

***Conclusion***
